

Damco Powers Practical AI Adoption to Help Enterprises Move from Pilot to Production

New Jersey, US – July 9th, 2025

Damco Solutions, a global technology partner with three decades of enterprise delivery experience, today announced the expansion of its AI services portfolio, focused on helping organizations shift from pilots to production. Combining AI Consulting, AI-infused Software Engineering, and a growing suite of AI Accelerators, the services draw on deep domain expertise and proven applications, like AI-powered decision support for better patient outcomes in healthcare, faster claims automation and fraud detection in insurance, and personalized product recommendations in retail platforms.

“At Damco, we focus on AI that’s operational, not just experimental,” said **Arnav Gupta, Vice President–Technology at Damco Solutions**. “Too many organizations are stuck in the planning phase or chasing generalized solutions that don’t fit. We bring together deep domain expertise, strong engineering foundations, and accelerators to move AI into production, quickly and responsibly.”

Building and Scaling AI That Works in the Real World

Through its AI consulting practice, Damco helps business leaders define actionable AI strategies focused on measurable impact. From maturity assessments to governance and compliance readiness, the consulting arm ensures enterprises are set up for responsible deployment at scale. These capabilities flow directly into Damco’s AI-powered software engineering, led by its proprietary **RAPIDIT™** framework, built to embed intelligence across the delivery lifecycle through automated code generation, reusable components, and integrated AI copilots.

To accelerate time-to-value even further, Damco offers a suite of deployable AI accelerators. **AssistAI** powers enterprise-grade bots and RAG workflows to streamline decisions and reduce manual effort. **IDP+** enables high-accuracy document processing across formats, cutting effort by up to 70%.

“We’re not just building models, we’re helping enterprises operationalize AI in ways that are fast, responsible, and aligned with business strategy,” said **Andrew Spada, Sr. Director–AI Practice at Damco**. “That’s what makes the difference between hype and actual business impact.”

Damco's commitment to ethical and scalable AI is underscored by its position as a Founding Member of the Center for Trustworthy AI, enabling world's leading enterprises to adopt AI more effectively. Damco's contribution to the center includes strategic frameworks and field-tested methodologies that help organizations ensure fairness, transparency, and long-term viability of their AI systems.

About Damco

Founded in 1996, Damco Solutions is a trusted technology partner for businesses from different industry verticals across the world. With three decades of technology experience combined with immaculate execution capabilities and an unwavering focus on customer success, Damco has empowered businesses ranging from startups to Fortune 500 clients with its tech-integrated solutions.
